Software Process Improvement in a Research Institute: Driven with Project Management Process

Banerjee, Durgasankar

Software Quality Professional v7n2 PP: 15-25 Mar 2005

ISSN: 1522-0540 JRNL CODE: SQP

WORD COUNT: 4933

Banerjee, Durgasankar

...DESCRIPTORS: **Intellectual property**

...TEXT: factors to consider, such as leadership, culture, people, balance in flexibility and structured project management, **intellectual property** (**IP**) management, research environment, and nurturing talent. All of these factors contribute significantly to managing research...

...R&D processes, people and culture, unstructured project management practices, lack of common vocabulary, weak **IP** management, ad-hoc engineering practices, lack of good rewarding mechanisms, inconsistent data gathering, lack of...

...the institute's research projects, as staff members focused more on research to create new **IP** rather than traditional software development. The task force came out with a lightweight framework based...

...role model, appreciation award, best paper award, royalty sharing with the inventors, and so on).

* **IP** management: **IP** management is important to manage new knowledge created during research. Project success factors are also measured in terms of **IP** created. An **IP** protection mechanism is equally important for the institute. Staff appreciation and rewarding mechanisms are in place to encourage the generation of **IPs**. The institute has developed an in-house **intellectual** property tracking office tool to manage invention disclosure and the patent process. A publication tracking tool...

...ups.

All procedures, templates, and checklists are uploaded on the institute's intranet for easy **access**. The staff members attended an extensive training program on the processes.

Project management office (PMO...

...factors such as: adopting the technology in national/international standards, winning local/international awards, new **IP** generation like patent, publications, and so on. The institute evaluates projects using both quantitative and...

...the business goals.

The institute's goals are:

* Produce outstanding research (intellectual capital)

* Create new **IP**, significant impacts

* Train staff, supervising master's and doctoral students in research projects (human capital...

...with cash funding

* Industry dollars received to fund R&D projects

* Revenue from royalties and **licensing** agreements

* No. of new products or processes commercialized

* No. of patents commercialized

Every month, metrics...

...projects, not the in-house research projects. Focus on the research projects is mainly on **IP** creation.

* The institute's approach to software process improvement (Gonradi 2002) is incremental. FR has...other applications. The list of such technologies also serves as a possible candidate for future **licensing**. Once the **licensing** deal is firmed up, a team (often the original team that developed the technology) is...

...members by engaging external consultants on project management, software engineering processes, patent process to protect **IP**, and so on.

CONCLUSION

Software process improvement amidst chaotic and adhoc practices in a research...
